

25X1C-1963-63
Copy 8 of 8

19 February 1963

RECORDED FOR: Chief, Operations Division

SUBJECT : [REDACTED] SECURITY Deployments

25X1C

25X1A

25X1C

1. On 18 February 1963, [REDACTED] security officer, Det. 2, now on 25X at Headquarters, was interviewed in order to solicit his ideas and suggestions on handling of security matters for deployments

25X1A

2. He pointed out the inevitable cross-fertilization that has occurred between Det. G and Det. 2, with personnel from both units having gained expanded knowledge of [REDACTED] Operations and Procedures. This situation will of course be monitored, to help prevent compromise of both operations.

25X1A

3. [REDACTED] had some observations and questions that are of immediate concern to 25X Operations.

25X1C

25X1A

B. [REDACTED] advised that the present hangar can accommodate two aircraft if a new building is built to house Det. 2 supplies and food supplies. This again would result in an expense that would not normally be incurred by Det. 2.

25X1C

25X1A

C. [REDACTED] desired to explore, on an informal basis, the possibility of additional deployment [REDACTED] during the next calendar year; an affirmative answer would give critical priority to the construction items mentioned above.

OUTSIDE USA, DMR

SECRET
REF ID: A663-43
Page 2

4. From a security viewpoint it would be far more desirable to conceal both aircraft in one hangar, rather than resorting to construction of a pre-fab hangar outside the compound fence to house one of the aircraft.

5. This information is provided for your information, assistance, and comment.
